SOUTH SHETLAND ISLANDS AND THE ANTARCTIC PENINSULA

Enjoy unforgettable moments when, for example, you set foot on the Antarctic mainland near to Paradise Bay. Snow-capped summits surround the bay, where icebergs drift and glaciers tower hundreds of metres above. The gigantic glacier cliffs, such as those of Neko Harbor, provide a unique backdrop. Gentoo penguins stretch as far as the eye can see, for example on Cuverville Island. One of the most impressive shipping passages in the world is the Lemaire Channel: mountains up to 1,000 m (3,280 ft) high line the strait of water. The Neumayer Channel and Port Lockroy provide panoramic views of glaciers that are no less breathtaking.

SOUTH ORKNEY ISLANDS

For scientists, the Antarctic is an enormous natural laboratory – and that includes this largely glaciated island group. You will also gain an insight into the everyday lives of polar researchers when, weather permitting, you will be taken in the Zodiacs to visit the Argentinian Orcadas Station (subject to authorisation). Enjoy the pure fascination of the drifting tabular icebergs which, with a bit of luck, you will see off Signy Island, for example. The bizarre blocks that have broken off the shelf ice and their huge archways shimmer a mystical shade of blue in the cool polar light. And you will pass close by on board the ship – simply breathtaking.

South Georgia (A)

In this unique wildlife paradise, the Zodiacs are used several times a day to let you experience very special sightings. For example, standing with the experts in front of a gigantic colony of king penguins. The island is home to hundreds of thousands of animals inhabiting the steep slopes and coasts – such as Salisbury Plain or the Gold Harbour beach where fur seals and elephant seals will not be disturbed by your visit. At the former Grytviken whaling station, the grave of Sir Ernest Shackleton recalls the adventures of times gone by.
